### PRINTING

photograph is a perfect bound book, printed in CMYK at 200 lpi on 80 lb text coated sheet using a sheetfeed press.

### LAYOUT SPECIFICATIONS

Ads should be either QuarkXpress or InDesign files. Include all fonts and linked graphics. Convert all type in placed graphics to outlines. A PDF is required for reference. A Photoshop file or PDF is not accepted for final ad layout.

### IMAGES

If you provide a digital file of a photograph for reproduction, the image should be the exact size it will appear in the ad, scanned at a resolution of 400 pixels/inch and saved as a TIFF without compression. If your digital file is RGB, we prefer that our printer does the conversion to CMYK; if you do provide a CMYK image, it should use the US Sheetfed Coated v2 profile for best results. All scanned images must be accompanied by a high quality reference print. The reference print will show us what you expect to print.

### AD COLORS

**BLACK & WHITE** Images are printed in grayscale.

**TWO COLOR** Black plus one color of type or background. We do not print duotone images. Any coloration of images requires a four-color ad.

**FOUR COLOR** Ads will print as CMYK. We will provide a Kodak proof for your approval at no charge. For color corrections/additional Kodak proofs, there will be a minimum \$50 charge.

### AD SUBMISSION

Ad material can be submitted via email to [anthony@photographmag.com](mailto:anthony@photographmag.com) or via file transfer: Dropbox, Hightail, or WeTransfer.

Ads not meeting these specifications and/or changes to ads already at the printer will incur production charges.
